

# Protect your health with Plevnik elevator

## SET YOUR WORKING HEIGHT AS YOU NEED

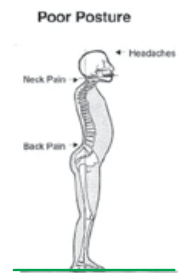

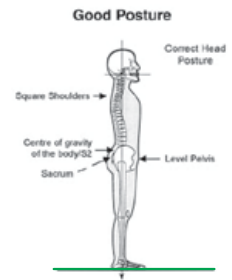

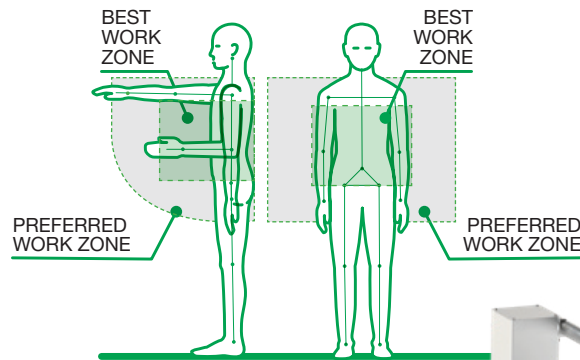

Everyone who runs business wants to increase productivity and efficiency. This is possible when workers have a good working environment. **Best working zone** enables easier work with less physical stress.

### 1. HEALTH FIRST

Long term work in inappropriate working environment can cause **poor posture** which leads to several health problems like back pain, neck pain, headaches and other.

At Plevnik, we are aware of the health issue. **Every human has their unique dimensions** of body parts, height, length etc.

**With Plevnik elevating device you can adjust working height anytime to your best work zone.**

### 2. USEFUL HEIGHT

We can use higher level of a kettle to have better and **easy streaming** from one to draining table (usage of potential energy).

**In one step** from cut cheese mass to cheese moulds. Useful **for lower ceilings** height in your dairy. **Tilting** of kettle enables to **complete outflow** of cheese mass.

**Easy, better and faster cleaning** under the kettle.

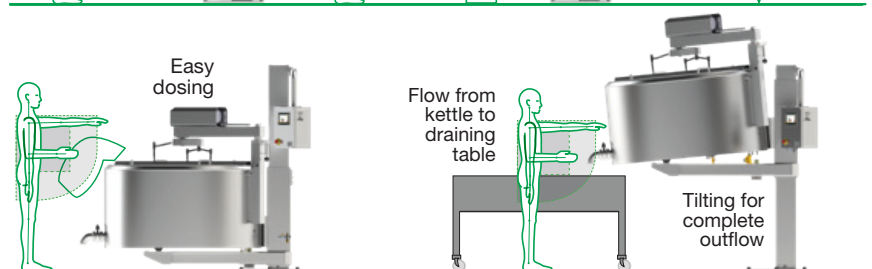

With button to best work zone in seconds.

### 3. ECONOMIC ERGONOMY

With elevating device you can do your work **faster** and **easier** (physically). In this way you **increase productivity**, have **less work-related illness** and get **happy, healthy co-workers**.
